Sepit – Service Offerings for – Temenos T24™

Local Developments and Application Management

We make available vast experience for clients to make the best use of Temenos T24™ through Local Developments. Our Offshore Application Management Services (OAMS) allows Banks to shift their focus from routine maintenance towards newer projects of importance. We address all the key issues, balancing cost, complexity and capacity for all areas of the application lifecycle.

Production Support

We provide services in the areas of - Day to Day Support, COB Support, Code Enhancements and Performance Tuning.

We offer specialized services in the areas of Performance tuning of Temenos T24™ systems with Oracle™.

Vendor Interaction

Having acquired immense knowledge by virtue of participating in large number of projects that are lead by - Vendor, System Integrator & 3rd Party Organisation, we are well aware of the issues/problems/gaps that arise and cause project delays and cost escalations.

Our experts take up roles of vendor interaction from the Bank's perspective to keep the project in the right track that will lead to minimising issues/problems/gaps.

Implementation Consulting - Functional

Our Team of Functional Consultants while being subject matter experts in Temenos T24™, come with relevant and vast industry experience viz. Banks Retail & Corporate, Brokerages & FSI.

Implementation Consulting - Technical

We make available vast expertise in various technical requirements for an implementation project. Technical Consultants with experiences in the range of 12 years to 2 years perform various roles - Architect, Team Lead & Developer.

Testing

We provide Testing Services through our team of Test Experts. The Methodology and Reporting adhere to Industry Standards.

User Training & User Guide

We have performed a number of User Trainings. These are bespoke programs that are developed and delivered based on Bank's implemented system and user profiles. We also provide services to create User Friendly Guides based on Roles and Processes.

SIBS - Internet Banking

A comprehensive, integrated & modular internet banking product for retail customers of the bank. Provides online access to various enquiries and transactional services.

Built-in adapter for T24™ Core Banking product and provides open standards based integration channels with various middle-ware and third party products.

.NET Integration and Applications

Unique in the Temenos T24™ Services Community, we have consciously developed skills in the Technology areas that facilitate building of .NET Applications for Multivalued Database based Systems.

Ace Learner - Interactive Learning Platform

A J2EE based Platform that facilitates User Friendly and Cost Effective mode of User Trainings. Powerful Features include - Trainer Assisted and Self Assisted Modes of Trainings.
